Water Pollution Control Update

Plant Operations

- **Outfall Relocation** – Contractor is actively working to excavate and install the new outfall structure.
- **Mixing Zone Study** – Following review of Ohio EPA comments, Amendola Engineering is preparing a revised mixing zone study for City review /approval.
- **Preventative Maintenance (PM)** –
 - Staff replaced both east and west LSA lines. Two new access structures were installed for future maintenance on the chemical system.
 - East final settling tank will be placed back in service the week of 9/22.
- **Generator** – Mechanical / electrical failure occurred on 9/12. Emergency backup 1000kw generator on site and wired for power. Cummins to be on site 9/22/25 to continue troubleshooting and repair efforts.

Collection System

-

Miscellaneous Updates

- **Technical Justification (Industrial Pretreatment)** – City personnel are completing the 7-day background sampling required for the technical justification. Once analysis is received following the sampling, the data will be provided to Verdantas for review.
- **Household Hazardous Waste** – We will be actively participating in the HHW collection day coordinated by the Ashtabula County Solid Waste District. The City will be providing thermometers to handout to the first 45 residents appropriately disposing of items containing elemental mercury.
